● March to Department for Education

Michael Gove has united everyone in education in opposition to his constant changes.

This is because he refuses to listen to teachers, parents, governors, academics or anyone else with the interests of students at heart. When he announced his EBacc U-turn it was telling that he said, "Success is stumbling from failure to failure with no loss of enthusiasm".

This is how he may judge himself, but it is hard to imagine him using the same criteria for a student, teacher or school. Education deserves a break from Michael Gove's failures.
Join the march to tell him it's time to go.
