SEVEN MONTHS after the atrocity of the Grenfell Tower fire, the rehousing of survivors and people displaced is disgracefully slow.

Theresa May has refused to grant the community a decision-making panel as part of the Public Inquiry.

In a shockingly insensitive move the Inquiry appointed the KPMG financial firm to manage its finances. This was despite KPMG previously working with three of the bodies being investigated.

KPMG was forced to pull out of the arrangement after an open letter was sent and concerns were raised by groups with core participant status in the Inquiry.

The successful challenge shows we can counter establishment attempts at cover ups.

Come and join the discussion about how we get can justice for the dead, for survivors and for the whole community.
